

# TESTEACHERS<sup>®</sup>

## Success Starts Here

### Pre-License Training Study Tips

Taking exams can be very stressful; please use the following tips to help with the studying process.

- **Print the 7 or 14 Day Study Plan PDF**
  - Do everything the Study Plan in the order it is presented (jumping around between sections will not help build the proper foundation for retaining the information)
- **Score an average of 90% on practice exams in the Certification Mode**
  - When scoring around a 90% average you will be well prepared for the state exam.
- **Know the Key Facts at the end of every section**
  - Each course has a Key Facts section; these key facts are very useful in studying for the state exam. It is a good idea to know these Key Facts, reviewing them again on the day your test is scheduled to prepare you for the exam.
- **Instructor Support**
  - If you are doing everything as listed above and the information is still not making sense, reach out to a member of our instructor team. Please do not wait until the end of the course to reach out with any questions you may have.
  - Here are the steps to contact an instructor:
    - Go to <https://testteachersonline.com/contactus>.
    - Please use the “If you are currently registered student who has a content related question please click here” link towards the bottom right side of the page.
    - “Fill out the form that appears.
    - An instructor will reach out to the student through email or phone call, within a few hours. If the help request is submitted before 4 pm PDT, the instructor will get back to the agent that day. Average response time varies depending on how many requests there are.
- **Video Links**
  - Here are two videos that were created by our President/CEO in regards to study and test taking habits.
  - The first link talks about test taking tips: [TesTeachers Test Tips](#).
  - The second link talks about exam question tips: [TesTeachers Exam Question Tips](#).
